## Code Part:

1. Make sure all the tags are closing Properly

```

index.html > html
<!DOCTYPE html>
<html lang="en">

<head>
  <meta charset="UTF-8">
  <meta name="viewport" content="width=device-width, initial-scale=1.0">
  <meta http-equiv="X-UA-Compatible" content="ie=edge">
  <title>Form layout</title>
  <link rel="stylesheet" href="CSS/style.css">
</head>

<body>
  <div class="container">
    <h1 class="header">Request For Quote</h1>
    <form>
      <div class="contact_container">...
    </div>
    <div class="products_container">...
    </div>
    <div>...
    </div>
  </form>
</div>
</body>
</html>

```

2. Try to reuse the border css by creating the new class

```

input[type=text],
input[type=email],
input[type=tel],
input[type=number] {
  width: 95%;
  padding: 7px;
  margin: 9px 5px;
  border: 1px solid #ccc;
}

.country {
  padding: 5px;
  margin: 9px 5px;
  width: 95%;
  border: 1px solid #ccc;
}

textarea {
  padding: 8px;
  margin: 5px 20px;
  width: 90%;
  height: 150px;
  border: 1px solid #ccc;
}

h1 {
  margin: 15px;
}

```

3. Give class name properly,

```

}
.visibility {
  display: none;
}
.contact-left,

```

Here the class should be d-none or display-none, like that, Css has visibility property also, so make sure you are doing proper class names.
