

Assignment 3 Review By Naveen Pisher

1. In Desktop Please increase the white spaces

2. In Mobile Please increase the white spaces

3. Code Part:

I would like you to use more bootstrap classes

Example:

```
.border-radius-50 {  
  border-radius: 50% !important;  
}
```

.rounded-circle

```
.vertical-center {  
  width: 100%;  
  margin: 0;  
  position: absolute;  
  top: 50%;  
  -ms-transform: translateY(-50%);  
  transform: translateY(-50%);  
}
```

.w-100, .m-0, .position-absolute

```
.scroll-up {  
  position: fixed;  
  right: 15px;  
  bottom: 15px;  
  background-color: rgba(33, 37, 41, 0.5);  
  width: 30px;  
  color: #fff;  
  height: 26px;  
  text-align: center;  
}
```

.text-white , .text-center , position-fixed

Just Suggestion

Using height is fine, but make sure content does not exceed height.
Wherever possible try to use min-height.

```
.thumbnail {  
  width: 60px !important;  
  height: 60px;  
}  
  
.border-left-light {  
  border-left: none;  
}  
  
.border-radius-50 {  
  border-radius: 50% !important;  
}  
  
.alignment-container {  
  height: 80px;  
  position: relative;  
}
```
